

Spot the difference:

You need at least one other person to play this game with you, you also need to collect some of your favourite toys from around the house. Put all of the toys together in front of you and take a good look at them. You close your eyes while your partner changes something about the toys, whether it is the order that they are in or maybe change a dolls hair. Your goal of the game is to spot the difference that your partner made! To make the game trickier add more toys or change a few things at once!

The sound chain game:

This game works best with a small group, you can play the game with or without instruments. The first player creates a sound pattern and each player adds to it on their turn.

Example:

Player one: Clap, clap, click

Player two: Clap, clap, click, clap click, clap.

Have fun creating different beats and rhythms!
